SUMMARY

As a seasoned Fullstack Developer and Systems Engineer, I offer a wealth of experience in delivering top-notch web applications using Next.js and dynamic mobile solutions with React Native. My proficiency extends to managing cloud solutions like Microsoft Azure, as well as optimizing server and network setups. Recognized for my problem-solving prowess I am dedicated to enhancing digital experiences and driving success within any team.

SKILLS

HTML/CSS/Javascript	React/React Native	Next Js	Git/Github	Typescript
Express	Node Js	Front End Development	Back End Development	Api Endpoint Development
Microsoft Azure	Powershell	WebRTC	Three Js	Blender

PROJECTS

Fullstack Developer
January 2020 - Present, Kingston

Freelance

- Specializied in Next Js and React Native to deliver powerful websites and mobile apps for my clients.
- Converted client visions from wireframes to functional and visually appealing digital solutions. Ensuring page load optimizations and responsive layouts.
- Implemented a social media network for students, allowing them to host study sessions in real time with chat and video calling.
- Published an app to the Google Playstore providing children with learning games to practice reading.
- Published an app to the Google Playstore That Splits and posts Long Videos to a users Whatsapp story.

EXPERIENCE

Systems Engineer
February 2023 - November 2023, Kingston

Vertis Technology

- Created, maintained and configured diverse user accounts. Utilized windows server and Microsoft Azure to guarantee full functionality and access privileges.
- Demonstrated expertise in both fully cloud-based and hybrid environments, optimizing performance and security.
- Conducted thorough research on server updates, assessing their safety and relevance to the current infrastructure.
- Provided end-user support and issue resolution through on-site visits, ensuring infrastructure updates and swift resolution of technical issues.
